

To: West Valley Citizen Task Force
From: Bill Logue, Citizen Task Force Facilitator
Date: June 4, 2013
Subject: **Summary of the May 29, 2013 Agenda Work Group Conference Call**

Call Participants

Tom Attridge, Lynette Bennett, Bryan Bower, Steve Kowalski, Elizabeth Lowes, Ray Vaughan.

Discussion

The work group convened by conference call to discuss possible agenda items for the June and July Citizen Task Force meetings. Bryan Bower reviewed the upcoming activities/outlook for the next 90 days with respect to High-Level Waste Canister Storage cask and pad design, Main Process Plant Building, Balance of Site Facilities, Waste Operations and formulation of plans for funds received through sequestration. Elizabeth Lowes reviewed Phase 1 Studies activities for the same period. Tom Attridge reviewed upcoming work for the Thomas Corners Road Bridge, Franks Creek erosion mitigation work and State-Licensed Disposal Area Trench 14 leachate level analysis status. Lynette Bennett reviewed the status of the Permeable Treatment Wall and HLW canister relocation schedule. Ray Vaughan suggested two additional items for meetings. First, the status of the railroad spur including its near and long-term upkeep and use, the arrangements with B&P Railroad and the role of the CTF in providing input on these decisions. Second, he suggested a discussion about arranging a meeting with Congressman Reed.

Following a discussion about the above items, there was general agreement that subject to the agencies verifying some information, the following topics be on the June agenda:

- Project look ahead with details on the Phase 1 work sequence and HLW canister relocation schedule
- Phase 1 Studies update
- CTF discussion on membership and outreach to elected representatives

Potential topics for July include:

- NYSERDA Update on Thomas Corners Road Bridge, Franks Creek Erosion Mitigation and SDA Trench 14 Leachate Levels
- Project Update with a focus on the Permeable Treatment Wall, MPPB D&D Sequence and Status and Rail Line discussion
