

WEST VALLEY CITIZEN TASK FORCE

Buffalo City Board of Education
City Hall, Room 801
65 Niagara Square
Buffalo, NY 14202

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer
On Behalf of the
West Valley Citizen Task Force

We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer
On Behalf of the

WEST VALLEY CITIZEN TASK FORCE

Town of Allegany Supervisor's Office
Town Hall
52 West Main Street
Allegany, NY 14706-1299

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

WEST VALLEY CITIZEN TASK FORCE

Town of Somerset Supervisor's Office
PO Box 368
Barker, NY 14012-0368

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Gerry, NY 14740

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

WEST VALLEY CITIZEN TASK FORCE

Village of Mayville Mayor's Office
PO Box 188
Mayville, NY 14757-0188

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Holley, NY 14470

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

Akron, NY 14001-0180

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

WEST VALLEY CITIZEN TASK FORCE

Town of Almond Supervisor's Office
PO Box K
Almond, NY 14804

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

WEST VALLEY CITIZEN TASK FORCE

Village of Almond Mayor's Office
PO Box 239
Almond, NY 14804

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

WEST VALLEY CITIZEN TASK FORCE

Village of East Aurora Mayor's Office
571 Main Street
East Aurora, NY 14052-1796

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

WEST VALLEY CITIZEN TASK FORCE

Allegheny-Limestone Board of Education
3131 Five Mile Road
Allegheny, NY 14706-9627

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Cheektowaga, NY 14225-5124

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution e onlyo3aod alCTF. nd wouldso appnd is wand riverniaare yies or your resolutire ths, may shed asy wir yoFedergin4, aSts wad rtrictoffi islst). Ine fir Weer resolutte

WEST VALLEY CITIZEN TASK FORCE

Randolph Board of Education
18 Main Street
Randolph, NY 14772-1112

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

Wilson, NY 14172-9798

29 December 2004

In June 2004, letters were sent from the West Valley Citizen Task Force (WVCTF) to 357 governing bodies in Western New York (see attachment). In that letter we asked for your support of a resolution (see attachment) passed by the WVCTF. We recognize that you are busy with many other issues but think you would agree that this is a matter of regional importance. If we can help explain the issue, please let us know.

We continue to believe that unrestricted release is the only acceptable cleanup standard for the West Valley Demonstration Project. Given the potential for contamination of the Great Lakes watershed, and recent developments for new legislation to insure that cleanup occurs, we seek your support of our resolution.

"Unrestricted release" is a level of cleanup defined in the Nuclear Regulatory Commission's regulations and would allow unrestricted future use of property after cleanup.

Attached are copies of our original letter, our resolution 1-2004, and an example resolution for you to follow. We would also appreciate receiving a copy of your resolution that we may share with our Federal and State elected officials. In the first quarter of 2005, the Citizen Task Force will transmit all the supporting resolutions we have received to the Western New York Congressional Delegation to demonstrate the extent of local government support for new federal legislation on cleanup of the West Valley Demonstration Project site.

Please send your resolution to:

John A Pfeffer
9203 Route 240
West Valley, NY 14171

Should you have any questions, or if you would like to speak with a member of the West Valley Citizen Task Force, please contact John Pfeffer at jpfeffer@buffalo.edu or (716) 645-6575.

Sincerely,

John A. Pfeffer
