

# West Valley Demonstration Project

## Project Update

**Bryan Bower**

**DOE West Valley Demonstration Project**

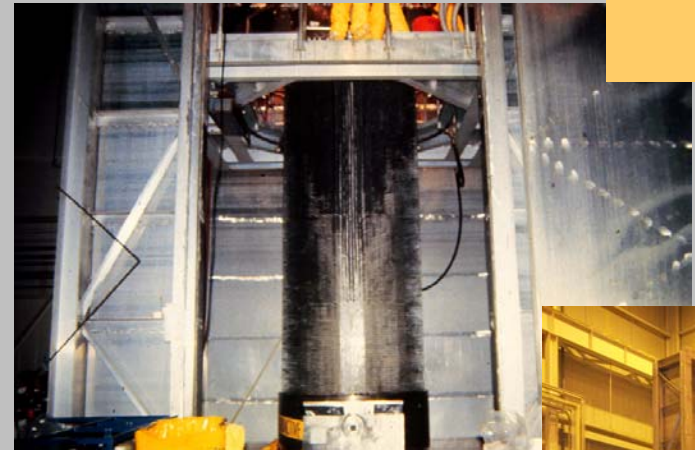

# Project Update

## ◆ Fuel Receiving & Storage (FRS) Decon Stall

- Aluminum stall 15' x 15' x 30' tall
- Approximately 2,800 ft<sup>3</sup> LLW size-reduced and packaged for disposal

## ◆ Boiler Removal

- Previously used to heat the Main Plant; replaced in late 1990s
- First large-scale asbestos removal project undertaken in several years

# Project Update

## ◆ Environmental Assessment

- Over next four years, DOE is planning to remove large number of facilities used by the WVDP
- Remaining facilities include:
  - Facilities being considered in the Decommissioning Environmental Impact Statement
  - Facilities required to support High-Level Waste Canister Interim Storage
- Removal of these facilities has been reviewed in two Categorical Exclusions (2004, 2005)
- DOE will review potential cumulative impacts of removing the facilities in an EA

# Project Update

- ◆ 2006 Progress Tours
  - Saturday, May 20, 2006
  - 53 visitors took part in three tours
