Core Team Update

In July the Core Team met in conjunction with an Interagency Roundtable (senior management)

July 9 Core Team meeting

- reviewed progress and topics for discussion at the Interagency Roundtable

July 10 Interagency Roundtable

- reported/discussed Core Team progress

July 11 Core Team meeting

- reviewed key topics and identified focus for August meeting

Core Team Update

July 9 Core Team meeting

Reviewed and discussed following topics:

- Potential near-term North Plateau plume containment actions
- North Plateau groundwater and soil sampling plans
- Considerations regarding removal of the Main Process Plant Building
- Main Process Plant Building radioactive inventory and decontamination approaches
- Site Liquid Waste Management Plan

Core Team Update

July 9 Core Team meeting (continued)

- Considerations regarding potential removal of tank 8D-3
- Stakeholder interactions
- Potential schedule(s) and budget for enhanced interim end state actions, and removal of the Main Process Plant Building and associated facilities
- NYSERDA proposal to separate Decommissioning EIS into two EISs

Core Team Update

July 10 Interagency Roundtable

Core Team reviewed and discussed topics covered at July 9 meeting with senior management from each agency.

Participants

- Department of Energy
- New York State Energy Research and Development Agency
- Nuclear Regulatory Commission
- Environmental Protection Agency
- New York State Department of Environmental Conservation
- New York State Department of Health

Core Team Update

DOE's Current Path Forward

- Enhanced Interim End State Actions
 - Move forward with NDA cover and slurry wall
 - Conduct pre-design characterization/evaluation for North Plateau plume containment
 - Further evaluate drying options for the underground tanks and associated liquid waste management
 - Continue DOE and NRC discussions on HLW canister on-site relocation for storage

Core Team Update

DOE's Current Path Forward (continued)

- Conduct multi-agency technical working meeting to review and discuss status and application of erosion modeling in long-term decision making at West Valley
- Continue with Decommissioning EIS; considering phased approach, with potentially issuing two Records of Decision (ROD)
 - First ROD potentially dealing with MPPB and associated facilities removal
 - Second ROD potentially for management of disposal areas and underground tanks
