

WVDP Project Update

Main Plant Process Building
Deactivation and Demolition Preparations

Kelly Wooley
Deputy General Manager

Citizen Task Force Meeting
June 22, 2022
(Virtual)

1

Safety

Metric	May 2022 12-Month Rolling Average
Total Recordable Cases (TRC)	0.63
Days Away Restricted or Transferred (DART)	0.31
Last Lost Time Case Recordable	April 26, 2022
Last Recordable Injury	May 12, 2022

Background Photo: Children's Safety Calendar creates awareness at work and home for employees

2

COVID-19 Controls

- CHBWV updated COVID-19 Mask and Screening Requirements to note the Cattaraugus County Community Transmission Level is Low (COVID-19 testing for all employees is no longer required)
- COVID-19 activities such as system rounds, preventive maintenance and cleaning/sanitizing continue with an increased emphasis on basic safety measures (e.g., washing your hands frequently, refraining from touching your face, utilizing face protection, use hand sanitizer and disinfectant wipes, etc.)
- CHBWV continues to monitor regional COVID-19 statistics and its personnel in accordance with CDC guidance

Background Photo: Occupancy limits remain in effect due to COVID-19

3

Main Plant Deactivation

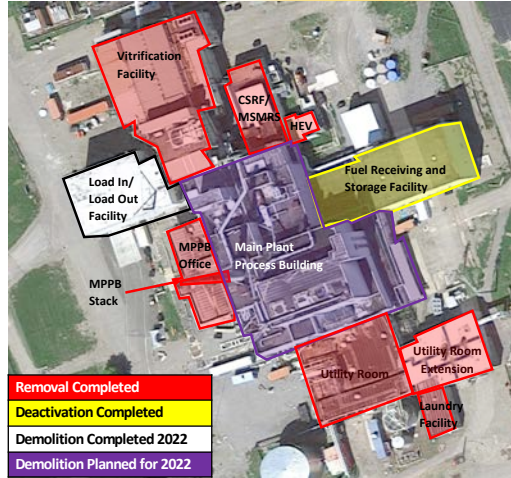

- **Product Purification Cell (PPC)** – Setting up equipment for aggressive decontamination of the walls below the mast climber platform (the mast climber is used to move workers up and down the cell)

4

Demolition of Ancillary Support Structures

- Load-In/Load-Out Facility** – Completed demolition; removed piping from the Off-Gas Trench that was located under the facility; completed backfilling and installed the French drain in Off-Gas trench to support future water management

*Ancillary support structures surround the Main Plant

5

Main Plant Demolition Preparations

- Water Management System** – Completed
- Drum Cell Modifications** – Completed (will be used for preparing waste containers for MPPB demolition)
- 10-Plex Modifications** – Completed (will house support operations for MPPB demolition, including showers, locker rooms, radiation monitoring control room, and respirator issue room)

6

NEW WORK SCOPE:

- **New Guard House** – Construction of the new guard house continues
- **Legacy Waste (Chemical Process Cell Degraded Containers)** – A Work Instruction Package to remove remaining (SUREPAKS) with High Integrity Containers (HICs) inside is being developed using lessons learned from the movement of the first four HICs
- **Tank Sampling (8D-4)** – Working on equipment design to remove legacy equipment from the tank riser and complete sludge sampling
- **Lagoon 4/5 Re-Route** – Performing bench scale study to support the conceptual design
