

New CEO Hire Enables Noah Technologies Chemicals Corp to be the Premier Customer-Centric Company

Noah Technologies announced the appointment of Jamie Hong as Chief Executive Officer, effective September 1st, 2020. Mr. Hong most recently served as Digital Supply Chain Operations Leader at Ernst & Young.

Jamie Hong

I am excited to join this experienced and tenured team and help lead it into its next 40-year evolution.

SAN ANTONIO (PRWEB) SEPTEMBER 09, 2020

As CEO of Noah Technologies, Mr. Hong's objectives are to capitalize on the company's existing relationships with world-class chemical clients by emphasizing scientific problem solving, outstanding quality, and exceptional customer service. Owner Sonya Blumenthal commented on her excitement about Mr. Hong's appointment to CEO. "Jamie brings the right experience and skillset to take Noah Technologies to the next level of innovation, quality and sustainable solutions. We look forward to having Mr. Hong build on our 40+ year foundation for the next 40+ years!"

Mr. Hong's 20+ years of experience prior to Noah Technologies set him up to not only be the perfect match for the company's current focus and vision, but to also contribute to the next several generations of growth. Mr. Hong has held positions and managed P&L at executive levels with relevant organizations such as Novartis and Merck & Co. Inc. As a consultant at Ernst & Young, Mr. Hong advised and executed critical projects for top Fortune 100 companies. Furthermore, Mr. Hong holds a versed background in technology sales and technology transformation working with some of the largest Fortune 1000's on their cloud transformations as an executive at Rackspace Technology. Mr. Hong is an active Operational Excellence practitioner and certified Lean Six Sigma Master Black Belt and TPS. He is highly skilled at turnarounds as he deeply focuses on institutionalizing change in various diverse environments, executing multifaceted global business development milestones, gross revenue and EBITDA. "It is an honor to join Noah Technologies here in San Antonio, TX." Stated Hong, "This organization has developed as a chemical leader in the emerging technologies and custom chemical space. I am excited to join this experienced and tenured team and help lead it into its next 40-year evolution"

Noah Technologies has embarked on a modernization, digital transformation and scaling to handle accelerated custom growth. Mr. Hong will be a critical leader in guiding Noah Technologies through their transformational journey.

About Noah Technologies:

Noah Technologies Chemicals Corp. is a women-owned manufacturer of high-purity and high-technology chemicals for research and production. Originally established in 1978 in Farmingdale, NY, the company moved to San Antonio, TX in 1985 to expand its manufacturing capabilities and product portfolio. More than 40 years later, Noah Technologies has become the leader in creating custom chemical products used in emerging technologies.

Noah Technologies has been a key partner in emerging environmentally beneficial technologies throughout its 43-year history. From the beginnings of vitrification technology in the disposal of nuclear waste at the **West Valley Demonstration Project**, to the modern-day use of synthetic zeolites to selectively capture radioactive cesium at the Fukushima power plant, Noah Technologies has been at the forefront of tackling major environmental endeavors. Noah Technologies is dedicated to helping solve the global water crisis and has even recently begun the development of a new technology that can provide drinking water from air.
